-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. Applicant's election without traverse of claims 5-11 in the reply filed on March 6, 2006 is acknowledged.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Adams (6,309,315). Regarding claim 5, Adams discloses a golf tee construction comprising a marking agent that is microencapsulated on the tee surface (column 5, lines 22-33). The user swings a golf club head and contact of the golf tee with the club face leaves a mark thereon.

Regarding claim 8, note column 9, lines 61 through column 10, lines 20 stating that the marking is left during certain swing speeds. Thus, the microcapsules rupture above a predetermined force threshold.

Regarding claim 9, attention is directed to column 10, lines 21-32 stating that microcapsules of different sizes may be used. Thus, Adams teaches for first and second predetermined force thresholds.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3711

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 7, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams (6,309,315). Regarding claims 6 and 7, it would have been obvious to one of ordinary skill in the art to use a volatile solid or liquid as the marking agent in the device of Adams in order to take advantage of those materials' well known physical characteristics.

Regarding claim 10, it would have been obvious to one of ordinary skill in the art to provide the different sized microcapsules with different colors in order to indicate the type of swing that user is making.

Regarding claim 11, it would have been obvious to one of ordinary skill in the art to have the microcapsules spontaneously release the marking agent after a period of time in order to allow the user to use the golf tee as a conventional tee without leaving a mark on the golf club face.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven Wong whose telephone number is 571-272-4416. The examiner can normally be reached on Monday through Wednesday 7am-5:30pm.
